

MOHAMMED AL-DALI

FULL-STACK WEB DEVELOPER

Sana'a, Yemen +967 770 354 220 mohammed.addali@gmail.com GitHub LinkedIn MyPortfolio

PROFESSIONAL SUMMARY

Full-Stack Web Developer with a focus on PHP and Laravel, and hands-on experience building web applications with MySQL, JavaScript, Tailwind CSS, and Alpine.js. Comfortable working across both the backend and frontend, from database structure and application logic to responsive interfaces. I enjoy solving practical problems, keeping code organized, and building features that are straightforward to use and maintain.

CORE STRENGTHS

System Architecture & MVC: Building organized backend structures that are easy to work with and maintain.

Performance Optimization: Working on database queries, page speed, and the flow of data between the application and database.

Problem-Solving & Debugging: Finding the cause of bugs and handling issues that appear during development and testing.

Agile & Collaborative: Comfortable working with others, paying attention to details, and learning new tools when needed.

TECHNICAL SKILLS

Backend Development: PHP, Laravel, RESTful APIs, MVC Architecture, Authentication

Frontend Development: HTML, CSS, JavaScript (ES6+), Alpine.js, Bootstrap, Tailwind CSS, Responsive Design

Databases & Management: MySQL, Relational Database Design, CRUD Operations, Query Optimization

Tools & Version Control: Git, GitHub, Browser Developer Tools, Postman, Composer

Methodologies & Practices: Clean Code, Problem-Solving, UI/UX Best Practices, Agile Workflow

PROFESSIONAL EXPERIENCE & NOTABLE PROJECTS

Full-Stack Web Developer

Digital Products E-commerce Platform

- Built a full-stack e-commerce platform with Laravel for selling digital products, gaming codes, and subscriptions.
- Designed the MySQL database and related queries to connect products, inventory, and customer orders, with automatic delivery of digital products after payment confirmation.
- Built responsive interfaces with Tailwind CSS that work across desktop and mobile screens.
- Used JavaScript and Alpine.js for features such as search filters and cart updates, reducing unnecessary page reloads and making the interface easier to use.
- Developed an admin dashboard for managing products and inventory, updating prices, and viewing sales information.

Full-Stack Developer

Dynamic Restaurant Management System

- Built a restaurant web application with a digital menu and an admin area for managing its content.
- Added CRUD functionality with PHP, MySQL, and Laravel for managing users and application data.
- Used JavaScript and jQuery to add interactive features and handle data updates between the page and the server.

Frontend Developer

Ancient Yemen Heritage Portal

- Created a static website about the history and culture of ancient Yemen.
- Built it with HTML, CSS, and JavaScript, organizing the content into clear sections with a simple layout focused on readability.

ADDITIONAL EDUCATIONAL PROJECTS

- Laravel Comment & User Management System (Laravel):** Built a small Laravel backend for user and comment management, including input validation and MySQL data handling.
- Responsive Bootstrap Portfolios (Bootstrap):** Created several responsive layouts using Bootstrap, HTML, CSS, and JavaScript components.
- Static UI/UX Layouts (HTML/CSS):** Created several static pages to practice responsive layouts, grid systems, alignment, and basic UI design.

EDUCATION & CERTIFICATIONS

- Bachelor of Science in Information Technology & Information Systems** — Queen Arwa University (2020-2024)
- Foundational Web Development Track** — Elzero Web School (2023-2025)
- Participant / Contributor** — Google Developer Group (GDG) Sana'a (October 2024)
